It was a great session about overthinking & anxiety and how it is linked. It was very useful for the action plan who are facing overthinking and anxiety and how to handle it. Most of all the session was interactive that's very useful for everyone. Would like to attend upcoming webinars about the mental well-being. Had really great session which was very useful to apply it in life for our mental health. Thank you!

This education was very useful for me. Really everyone should study. They provide high quality education with very little money. I have never seen such a good hearted institution. Even though we are scholars, we are already studied in Quran and Prophets, but this institution helps to stimulate our brains in detail.

I've completed my bachelor's in psychology in distance (corresponding). And I had no knowledge about psychology. The course in diploma psychology helped me gain more knowledge and information in psychology. It was really helpful for my personal growth also. I'm very glad that I had joined this course. Even the islamic psychology they provided is very useful for day to day to life achievement. Thank you for the opportunity to give me a feedback about Sypa.

This session on 'Agam', Puram' was soo intresting and knowledgeable. By this session had a clear understanding about healthy marriage, and about the methods to improve male in female understanding. Got a clear view on how to improve the understanding of marital issues. Thank You! for this great session.

Wonderful session of how life's perspective can be changed towards a positive vision and the teaching was excellent

The session on "Marital Councelling" brought about clarity & differences between Gender characteristics. Reasons & reactions were simplified, explained in a way that is understandable by all. Development of understanding to bring about a healthy marriage could be successful by the will of Almighty & considering these keys. A knowledge that everyone needs but still underrated. Thanky ou for this effort to bring about betterment amongst the society.)

I learned to think of the present instead of thinking of both the dead and the future. I learned how to let go of unnecessary burdens. I learned my good and bad qualities by asking my family and friends. I learned the characteristics of winners and losers. I learned the differences between the two by choice or by chance. Very Very useful.
